§ 371 (c)(1),

(2), (4) Date: **Feb. 26, 2014**(57) **ABSTRACT**

An approach is provided for managing the presenting of information related to location-based events. A location-based event platform determines to associate at least one location-based event with one or more geographic locations. An aggregation of information associated with the at least one location-based event is caused. The location based event platform also causes, at least in part, a presentation of at least a portion of the information at a device, based at least in part, on location information of the device with respect to the one or more geographic locations.
